

PUBLIC HOUSING

THE PUBLIC HOUSING SERVICE (SAP)

The public notice

Once a year (usually in march or april) a public tender is announced, in which it is possible to apply by presenting a request on Regione Lombardia's platform. To be kept up to date on the timing and participation methods: [Bandi assegnazione alloggi Servizio abitativo pubblico \(SAP\) | Comune di Brescia](#).

The request

The person who requests the assignment of a public accommodation makes some declarations regarding their family (eg. ISEE, eviction, disability, being a dormitory guest). Based on all the declarations made, Regione Lombardia's Platform assigns a score to each request.

The ranking

After the tender's deadline, all the applied requests will be automatically put in a ranking list generated by Regione Lombardia's Platform. The order of the ranking is established by the score assigned to each request.

Verifications

The assigning of the available accommodations is done following the ranking's order, giving priority to those who have an ISEE lower than Euro 3.000 . The declarations made in the request are verified, and only after a positive verification, the Municipality (Comune) proceeds with the assignment. Therefore, being in the ranking is not sufficient to obtain an accommodation: you need to wait for your request to be verified and for the Municipality (Comune) to proceed with the assignment.

The assignment

After the verifications, one who's entitled to an accommodation gets contacted by the Municipality (Comune) on the email address or the phone number written on the request. Regardless, all the verifications shall be waited on and keep in mind that assignments can only be done if there is an accommodation with adequate size for the applicant family.
